

Capebio™
Rich in Diversity

Capebio™ scrub is an antiseptic skin cleanser for the disinfection of hands before and after surgery. This product is applied directly on human and animal skins as a disinfectant, antiseptic and antifungal detergent. The product can also be used to cleanse wounds, lacerations and for cleaning skin pre- and post medical procedures.

Capebio™ scrub
Antiseptic Scrub with 4% Chlorhexidine Gluconate

Capebio Scrub is available in 1L refillable bottles with a pump nozzle and 5L bottles.

Apply about 5ml of Capebio Scrub on hands and wash for 60 seconds.

Rinse your hands with running water for 30-60 seconds.
